CREDENTIALS

SAP Gold Partner · RISE with SAP · PCE Partner · Salesforce Partner · Workday Services · CMMI · ISO 9001 · ISO 27001

GLOBAL FOOTPRINT

Delivery centres in 10 cities, *projects across 30+ countries.*

Follow-the-sun coverage spanning four time zones, anchored by India delivery hubs and onshore presence in key client geographies.

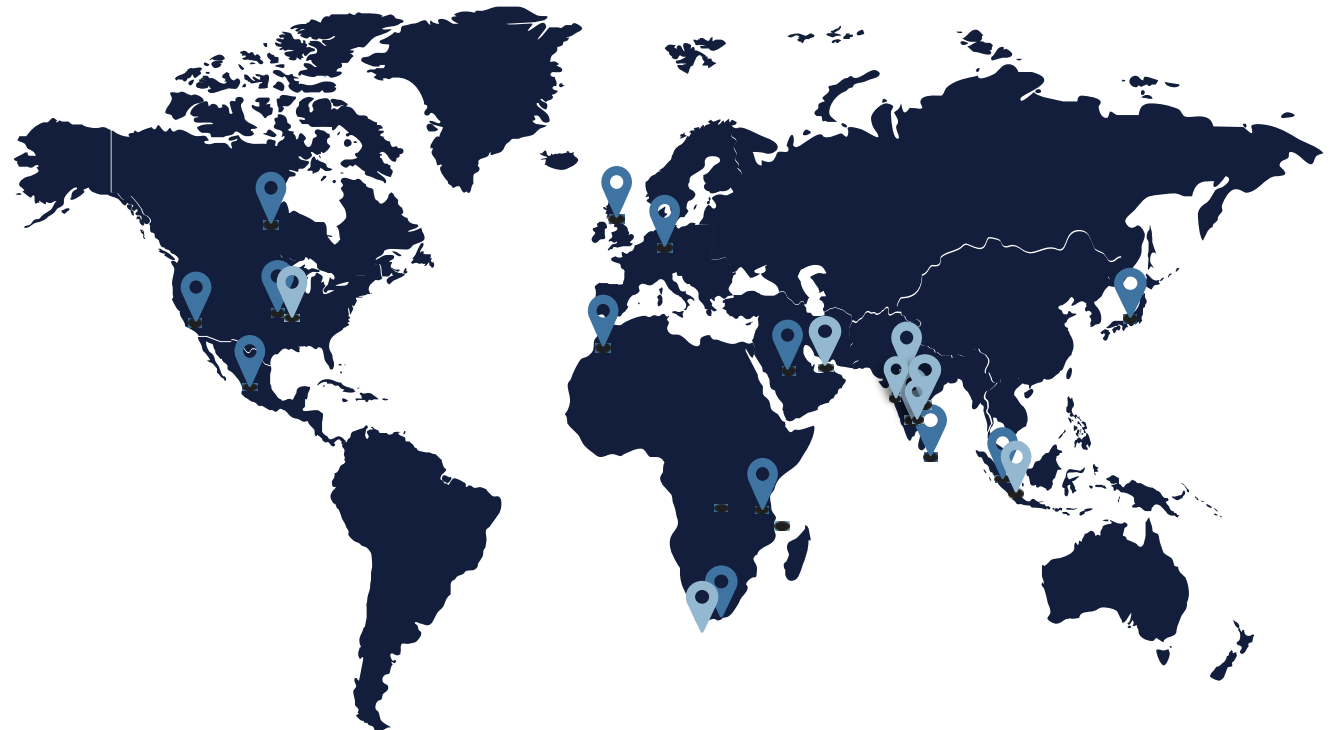

Projects across 30+ Countries

India | UK | US | Canada | Singapore | UAE | Thailand |
KSA | Kenya | Australia | South Africa | Belgium | Sri
Lanka

10+ Delivery Centers

Bengaluru | Mumbai | Delhi | Bhubaneswar |
Hyderabad | Chennai | Singapore | Dubai | Nairobi |
Johannesburg

Four practices.

One delivery engine.

Each practice operates with its own deep specialization, while sharing a common delivery model, governance and account leadership.

SAP Enterprise Solutions

RISE · GROW · S/4HANA · Ariba · Concur · SuccessFactors · Syniti

Salesforce

Sales · Service · Marketing · Commerce · Einstein · Industry Clouds

Workday

HCM · Financials · Adaptive Planning · Workforce Analytics

Application Development & Managed Services

Custom dev · Integration · Mobile · 24×7 AMS support

STRATEGIC CLOUD ALLIANCES AWS · Microsoft Azure · Google Cloud · SAP · Salesforce · Workday

Three Tiers, *one continuous engagement.*

Clients engage at any tier — advisory, build, or run — and move across tiers as the program matures. The same delivery engine runs underneath all three.

TIER 01

Business Consulting & Advisory

Define the transformation — where to play and how to fund it.

Transformation strategy

Business case

Process re-engineering

Change management

Digital roadmap

TIER 02

Platform Transformation Services

Build the new core — SAP, Workday, Salesforce and custom engineering.

SAP S/4HANA & modules

Workday

Salesforce

Custom application engineering

TIER 03

Managed Services & Sustenance

Run, optimise and extend — protecting the investment.

AMS

Application support

Technical operations

Continuous improvement

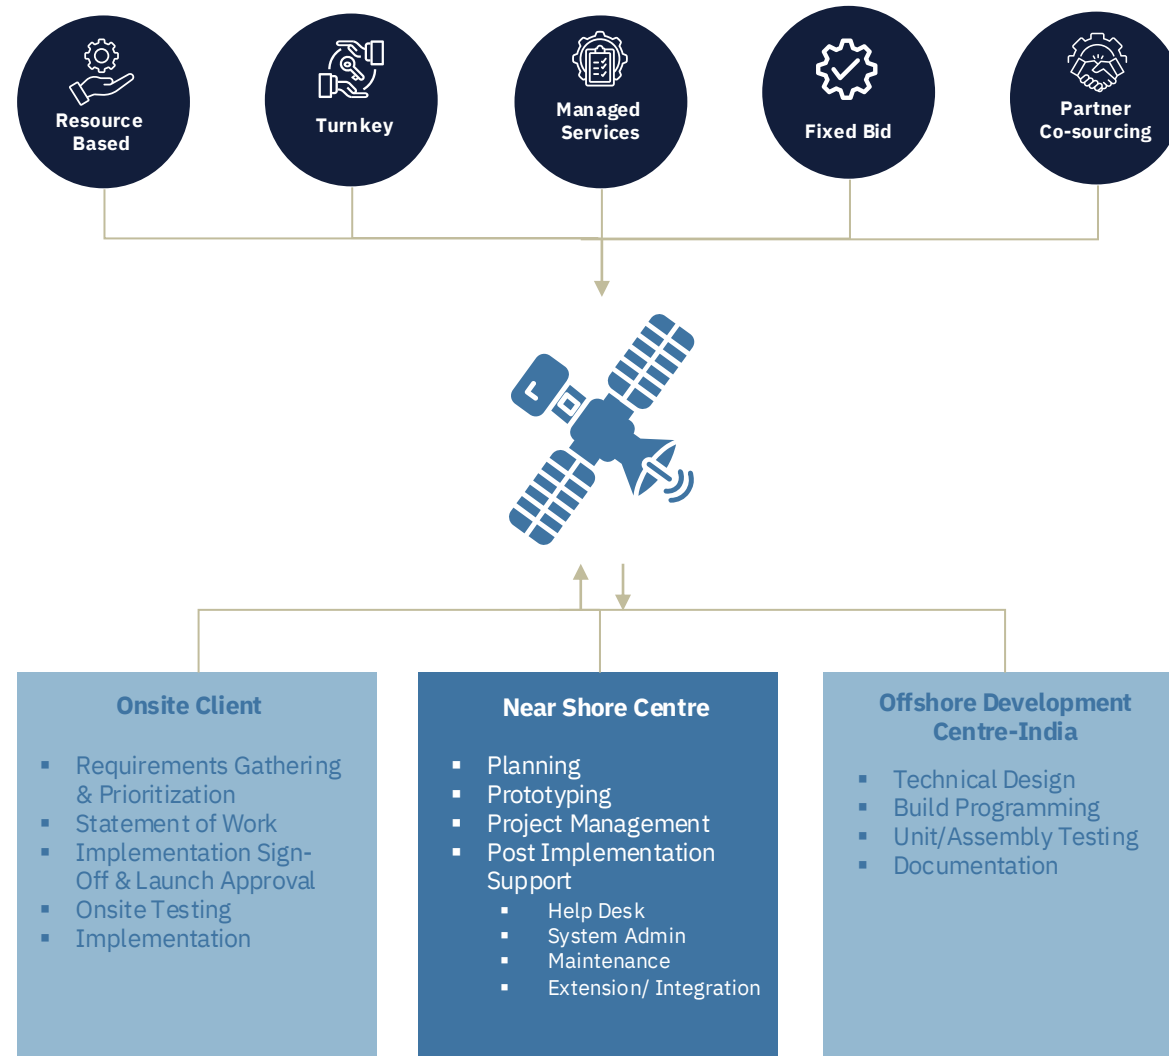

**ONE DELIVERY
ENGINE**

FastForward methodology · Development factory · Global AMS bench · Account-level governance

ENGAGEMENT

Choose how you want *us to deliver.*

Five engagement models, three delivery footprints, and a standard discovery-to-scale path that most clients follow on their first engagement.

01

PRACTICE

SAP Capabilities

SAP Gold Partner. 300+ consultants. 1,000+ combined years of SAP experience.

A Proud SAP Gold Partner

300+ consultants · 1,000+ combined years of SAP experience · 50+ clients across manufacturing, infrastructure, professional services, metals & mining, utilities.

Partnership Depth

- SAP Gold Partner
- RISE with SAP (BTaaS)
- PCE & Co-Innovation Partner
- Active in SAP user groups

Industry Experience

- 50+ SAP clients
- Manufacturing, Infrastructure, Mining
- Utilities, Pro. Services
- Public sector

Specialized Skills

- 300+ consultants
- 40% technical · 60% functional
- Migration & transformation experts
- All major platforms

Solutions & IP

- RISE/GROW implementation
- AMS support
- Country payroll localizations
- Packaged S/4HANA add-ons

SAP SuccessFactors 

SAP Ariba 

SAP Concur 

SAP S/4 HANA
PRIVATE CLOUD

SAP BTP

What we deliver

across SAP.

Three lenses on the same SAP practice — the platforms we configure, the services we provide, and the industries where we have the deepest delivery experience.

SOLUTIONS	SERVICES	INDUSTRIES
- SAP S/4HANA Public Cloud - SAP S/4HANA PCE - SAP Ariba - SAP SuccessFactors - SAP Analytics Cloud - SAP Extension Suite - SAP Integration Suite - SAP C/4HANA - CALM & Solution Manager	- Digital transformation - End-to-end implementation - Rollout & carve-outs - Upgrade & migration - SAP advisory services - Analytics & reporting - SAP security services - Industry solutions - Support & maintenance	- Automotive & Manufacturing - BFSI - Retail & E-commerce - Energy & Utilities - Engineering & Construction - Pharma & Life Sciences - Chemicals & Fertilizers - Government & Public Enterprises - Professional Services

Three paths to S/4HANA — *we run all three.*

RISE, GROW, and Private Cloud Edition give clients different starting points. Our methodology, accelerators, and certified consultants cover the full spectrum.

RISE WITH SAP

Business-process-led transformation

Greenfield or brownfield. Full S/4HANA transformation with integrated business services, infrastructure, and SAP-managed cloud.

Greenfield · Brownfield · Selective Data Transition

GROW WITH SAP

Public cloud, fast time-to-value

Pre-configured industry processes on SAP S/4HANA Cloud Public Edition. Designed for mid-market and faster-moving units.

Pre-configured · Best-practice · Quarterly innovation

S/4HANA PRIVATE CLOUD

Customised, on dedicated cloud

PCE for organizations that need deep customization, complex integrations, or regulatory isolation. We are an SAP PCE Partner.

Dedicated tenancy · Full customisation · PCE Partner

30% faster go-live vs benchmark

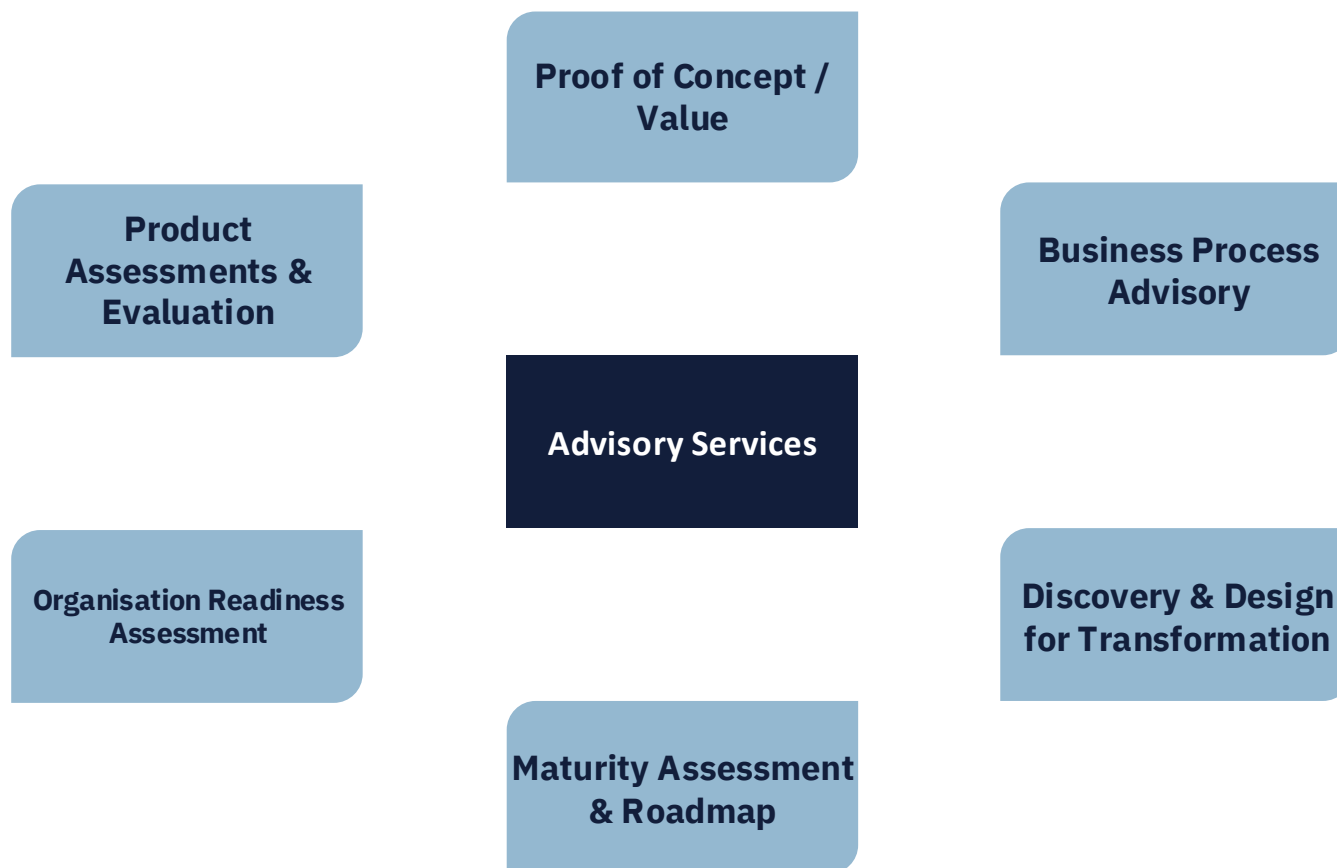

25+ S/4HANA programs delivered

100% go-live success rate

We help you decide *before you commit.*

Six advisory engagements designed to de-risk the transformation decision — from initial product evaluation through to a board-ready roadmap.

- Full-lifecycle consulting and application management
- Global footprint, local expertise
- Integrated commodity-to-premium services
- Industry, technology and process assets in every engagement
- Measurable business and IT outcomes
- One global operating model — built for speed, quality and scale

SAP Activate, accelerated by In2IT EBS.

Five Activate phases, compressed by accelerators, pre-built configurations and a single delivery team that runs from Discover through Run.

We leverage deep SAP specialization from our industry, technical, and functional competency centres to deliver differentiated results to our clients. In2IT EBS has been a strategic partner with SAP in many different roles and is recognized by SAP as a certified provider of implementation services.

01 · PATH
Delivery model

Greenfield

New build

- New S/4HANA implementation
- Process re-engineering on a clean core

Brownfield

Convert in place

- System conversion from ECC
- Technical & functional upgrade

02 · ROLLOUT
Rollout pattern

Global

Build the template

- Common SAP template build
- Process harmonisation across geographies

Localization

Adapt for country

- Country-specific legal & tax rules
- Localised business processes & payroll

03 · METHODOLOGY
How we deliver

01

SAP Activate

Standard framework with guided configuration.

02

Rapid Deployment

In2IT RDS for accelerated go-live scenarios.

03

Accelerators

Pre-built tools, templates and IP.

04

Solution Manager

Governed rollouts on SolMan + In2IT toolkit.

Full-suite SAP SuccessFactors, delivered at scale.

125+

Projects delivered

Globally across Core HR, Talent, Payroll, Workzone

87+

Certified HXM consultants

70% Associate · 30% Professional certified

10+

Live proofs of concept

Joule for HR, Talent Intelligence

Core HR & Talent

Employee Central, Recruiting, Onboarding, Performance, Succession & Career Development

Cloud Payroll & Compensation

Employee Central Payroll, Compensation Planning, Variable Pay, global statutory compliance

Time & Attendance

Time Management, Time Sheet, plus IN2IT's proprietary accelerator for complex time solutions

Learning & Talent Intelligence

LMS, Skills Ontology, Talent Intelligence Hub, AI-driven career and growth recommendations

Employee Experience

HR Workzone digital front-door, Qualtrics EX listening, Concur Travel & Expense integration

People Analytics & Planning

Workforce Analytics, Headcount Planning, executive scorecards and predictive attrition models

HIGHLIGHTS

Only partner to successfully deploy 2 HR Workzone instances

Largest certified SAP HXM consultant pool in region

Proprietary iTAM accelerator for Time & Attendance

EBSx rapid-deployment kit with leading practices

Joule-for-HR enablement playbook

100% success rate on HR transformation projects

PARTNERSHIP FOCUS

Proof-of-concept partner for SAP · SuccessFactors extensions on BTP · Proprietary Talent, Time & HR solution · Joint Joule pilots for HR personas

AI-powered diagnostic. Industry-benchmarked. Outcome-drive – *engineered to unlock measurable HR value.*

AI-Powered Diagnostic

ML on your tenant, not opinions on a spreadsheet.

- ML audit of configuration, RBP and business rules
- Anomaly detection across usage and audit logs
- Joule & Talent Intelligence readiness scoring

Industry Best-Practice Benchmark

200+ peers across 12 industries.

- Process maturity vs sector top-quartile
- Adoption, NPS and time-to-value benchmarks
- Customization-to-standard ratio vs peers

Outcome-Driven Roadmap

Quantified value, not a 60-slide deck.

- Prioritized backlog with \$ / FTE / hours saved
- Joule, GenAI and clean-core activation plan
- Executive-ready impact scorecard

H I G H L I G H T S

Proprietary Health Check 360 framework with AI accelerator

ML-driven configuration & adoption analytics

Industry benchmark dataset — 200+ companies, 12 sectors

Joule and Talent Intelligence readiness scorecard

Senior SuccessFactors architects in every engagement

Executive-ready output with quantified \$ / FTE impact

Optional remediation roadmap & AMS handover

M E A S U R A B L E O U T C O M E S

Typical impact from an IN2IT Health Check engagement

30–40%

Reduction in customization debt

Custom fields, business rules and RBP rationalised against SAP best practice

25%

Lift in monthly active users

Adoption uplift from UX cleanup and Joule-enabled self-service

2×

Faster Joule / AI activation

Readiness pre-checks compress time-to-value for GenAI scenarios

4–6 wk

Typical engagement duration

Discovery, AI-driven analysis, benchmarking and executive readout

End-to-end Concur, *with the integrations to match.*

Three Concur pillars — Expense, Travel, Invoice — implemented and integrated with leading ERPs, CRMs and finance platforms.

Expense

Automated capture, approvals and policy enforcement. Mobile receipts, corporate card feeds, intelligent audit.

Travel

Online booking, traveller policy management, duty-of-care reporting and integrated supplier content.

Invoice

Supplier invoice capture, three-way match, payment processing and AP automation at scale.

INTEGRATED WITH

SAP S/4HANA · Salesforce · NetSuite · QuickBooks · Microsoft Dynamics · Workday · Intacct

25+ Concur implementations

12wk average go-live

4 country tax configs

Concur, wired into your *finance landscape.*

Concur rarely sits alone. Our integration competency spans the platforms most enterprises run alongside it — ensuring expense, travel and invoice data flow cleanly across the stack.

ERP / Finance

- SAP S/4HANA
- Oracle EBS
- Microsoft Dynamics
- NetSuite
- Intacct
- QuickBooks

HR & Workforce

- SuccessFactors
- Workday
- Oracle HCM
- Identity providers

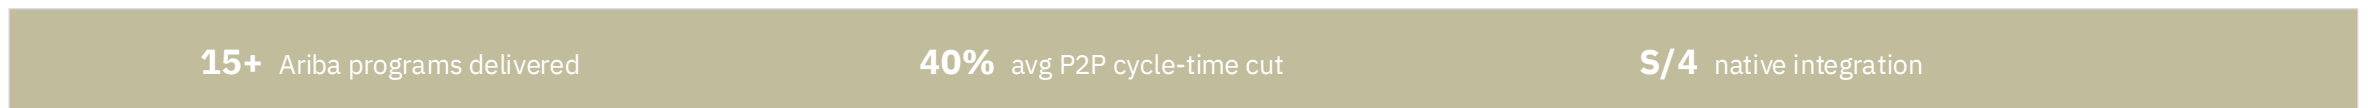

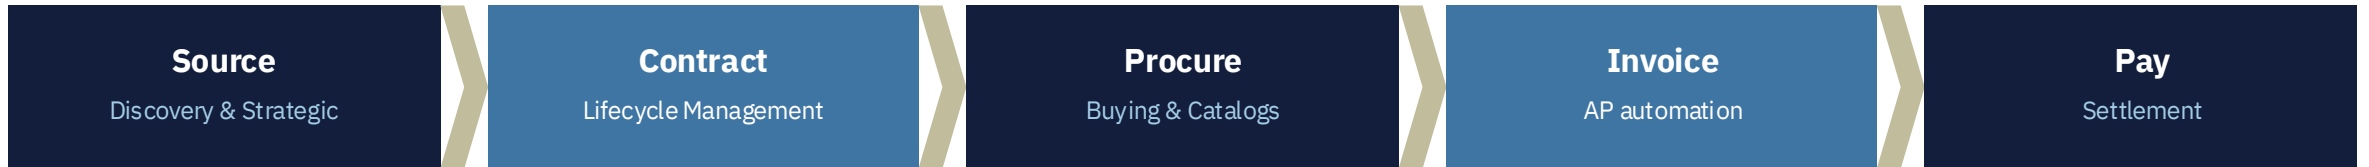

Travel & Card

- Corporate card feeds
- Travel suppliers
- TMC integrations
- Receipt OCR

Source-to-Pay, *automated end-to-end.*

We implement the full SAP Ariba suite — from supplier discovery through invoice automation — integrated cleanly with SAP S/4HANA, Concur, and downstream finance systems.

SAP's Generative AI Co-pilot – *embedded across every every SAP cloud application.*

- Early-adopter partner for SAP Joule & Joule Studio
- Production Joule agents for HR self-service and ticket triage
- Joule + (OpenAI, Claude) integration patterns
- Custom skill library for Concur, Ariba, SuccessFactors
- Responsible-AI guardrails and prompt governance
- Adoption playbook to drive Joule usage across personas

Deployment Experience

- 10+** Joule rollouts across SuccessFactors, S/4HANA Cloud and SAC
- 2** Custom Joule Studio agents & skills in production

Joule Practitioners

60+

01

Joule for Business Users

Natural-language access to HR, Finance, Supply Chain and CX data inside SAP apps

02

Joule Studio

Build custom AI skills and agents that plug Joule into your specific workflows

03

Joule Agents

Autonomous cross-app agents for Concur, Ariba, Fieldglass and ITSM scenarios

04

Joule for Developers

ABAP / CAP code generation, unit-test scaffolding and dev acceleration

SOLUTIONS AND OFFERINGS

Joule activation for SF & S/4HANA · Joule Studio custom agents · Joule + Claude interop · Adoption & change management for AI assistants

Custom Generative AI, ML, and Document AI – *all on SAP's Business Technology Platform.*

Generative AI

Custom GenAI apps on SAP AI Core with foundation models and HANA Vector Engine

Machine Learning

Predictive forecasting, anomaly detection, classification on S/4HANA data

Embedded AI

Pre-built AI scenarios across Finance, HR, Sales and Supply Chain

Document AI

Invoice, PO, contract and HR document extraction via Document Information Extraction

SOLUTIONS AND OFFERINGS

- Custom GenAI apps on BTP using SAP AI Core, Foundation Models and HANA Vector
- RAG pipelines over SAP enterprise data — policies, contracts, HR knowledge bases
- ML-driven forecasting, anomaly detection and intelligent process automation
- AI governance, model lifecycle management and responsible-AI guardrails
- Hyperscaler-agnostic deployments across AWS, Azure and Google Cloud

HIGHLIGHTS

Production GenAI use-cases delivered for HR and Finance

Pre-built RAG accelerator on HANA Cloud Vector Engine

AI Governance framework aligned with EU AI Act

Cross-skilled team: SAP + Python + LLM Ops

Joint POC partner for SAP AI Core innovations

Reference architectures for every hyperscaler

Extending SAP, *Without modifying the core.*

SuccessFactors Extensions

- Custom UI extensions using SAPUI5 / Fiori on BTP
- Workzone for HR — digital front-door experience
- Visa & Permit Management proprietary solution
- Shift Scheduling and Rostering applications
- iTAM — proprietary Time & Attendance extension
- Integrations to payroll, finance and 3rd-party HRMS
- Side-by-side apps via Cloud Foundry and Kyma runtimes

S/4HANA Extensions

- Clean-core extensibility — ABAP Cloud, RAP, key-user tools
- Side-by-side apps on BTP using CAP (Node.js / Java)
- Fiori app development and custom analytical apps
- Event-driven integration via SAP Event Mesh
- Process automation with SAP Build Process Automation
- Master-data harmonization across S/4 and SF
- Migration of classic ABAP enhancements to BTP side-by-side

HIGHLIGHTS

8+ proprietary BTP-based extensions in production

Clean-core certified delivery approach

Extension accelerators reduce time-to-value by 40%

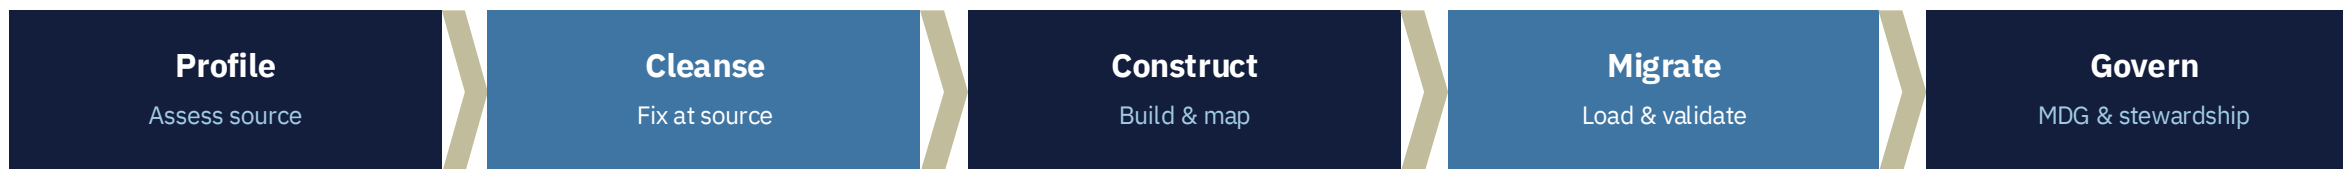

Joint Proof-of-Concept partner with SAP

Cross-stack team: ABAP, CAP, Fiori, Node, Java

DevOps-enabled CI/CD pipelines for SAP extensions

Data migration is the *real risk in S/4HANA.*

70% of SAP transformations slip because of data, not technology. Our Syniti practice combines SAP Advanced Data Migration (by Syniti) credentials with a proven five-stage migration approach.

Data Migration

- SAP Advanced Data Migration (by Syniti)
- Pre-built ETL templates
- ECC → S/4HANA conversion
- Mock-load cycles & cutover orchestration
- Reconciliation reporting

Data Quality & MDG

- Syniti Knowledge Platform
- SAP Master Data Governance
- Cleansing rules & dashboards
- Match & merge
- Ongoing stewardship workflows

Information Governance

- Data strategy & operating model
- Policy & standards
- Data-quality scorecards
- Stewardship enablement
- Master-data lifecycle

20+ ECC→S/4 migrations

99.5% data integrity at cutover

3x faster than manual ETL

Analytics, planning, prediction — *on a single SAP platform.*

We implement SAP Analytics Cloud as the front door to enterprise data, combining business intelligence, planning and predictive analytics in one experience.

- ➔ Give employees the freedom to analyze the specifics of their business
- ➔ Simulate and predict what could happen next
- ➔ Plan and collaborate on a course of action
- ➔ Implement decisions to derive immediate value

01 Unified Data Insights

05 Streamlined Collaboration

02 Improved Data
Accuracy & Efficiency

06 On-the-Go Access

03 Enhanced Decisions with
Real-Time Dashboards

04 AI-Powered Insights

07 Data Security and
Compliance

HOW IN2IT DELIVERS SAC

Pre-built dashboard accelerators · live connection patterns to S/4HANA, BW/4HANA, Datasphere · planning templates for FP&A, sales, workforce ·
average first-dashboard in 3 weeks

The full SAP analytics stack, *modernized.*

We deliver across SAP's current analytics portfolio — Analytics Cloud, BPC for planning, and Datasphere as the unifying data layer. Legacy stacks like Lumira are deliberately retired in favour of SAC.

SAP Analytics Cloud

Self-service analytics, governed

- Live & import models
- Smart Predict & planning
- Embedded into SAP apps

SAP BPC / Group Reporting Reporting

Enterprise planning & consolidation

- Driver-based planning
- Statutory consolidation
- Multi-currency, multi-entity

SAP Digital Boardroom

Executive steering, in real time

- Live drill-through to ERP
- Strategic KPI views
- Simplified steering meetings

SAP Datasphere

Business data fabric

- Unified semantic model
- Federated access
- Replaces legacy data warehouses

Business-ready, GST-compliant *S/4HANA — out of the box.*

Our packaged S/4HANA solution combines pre-configured industry processes, embedded analytics, and Fiori UX into a deployment that goes live faster and runs leaner than a ground-up build.

GROUND-UP BUILD

The conventional path

12–18*months*

Typical timeline

Custom*build*

Tax & statutory config from scratch

High*risk*

Discovery, design and test cycles

IN2IT EBS PACKAGED S/4

Our pre-built path

16*weeks*

Typical go-live, pre-configured & GST-compliant

GST*ready*

India tax, statutory & process content out of box

Fiori*+ live BI*

Modern UX with embedded real-time analytics

WHAT'S INSIDE THE PACKAGE

● S/4HANA Core

● India localization & GST

● Embedded real-time analytics

● Fiori UX (desktop + mobile)

● Day-2 AMS bench

RICEFW, industrialised.

An offshore ABAP factory built around Reports, Interfaces, Conversions, Enhancements, Forms and Workflow — delivered through a leveraged service-centre model with predictable throughput.

R

Reports

Custom development of reports beyond SAP standard.

I

Interfaces

IDoc, ALE, file transfer, XML, REST/SOAP APIs.

C

Conversions

BAPI, LSMW, BDC tooling for one-time data migration.

E

Enhancements

BAdI, User Exit, Implicit / Explicit Enhancement framework.

F

Forms

ABAP Script, Smart Forms, Adobe Forms, PDF output.

W

Workflow

Repeatable approval processes wired to business events.

The platform layer, *operated as a service.*

Basis services span the full SAP lifecycle — from pre-implementation architecture to ongoing operations — typically delivered as managed service alongside our functional teams.

The Converged Intelligence Stack

We emphasize on bringing SuccessFactors, Joule, BTP AI, and extensions into one operating model

BUSINESS OUTCOMES

Employee XP · Customer XP · Finance velocity · Supply resilience

ASSISTED EXPERIENCE

SAP Joule · Joule Studio · Joule Agents · Custom skills

INTELLIGENCE FABRIC

SAP BTP · AI Core · HANA Vector · Foundation Models · Event Mesh

DATA & PROCESS CORE

S/4HANA · SuccessFactors · Ariba · Concur · 3rd-party systems

EXTENSIONS · INTEGRATION · GOVERNANCE

Three converging forces — one operating model.

Composable

Clean core, side-by-side extensions — swap components without re-platforming.

Intelligent

GenAI, ML and Joule embedded into every persona's daily flow of work.

Continuous

Advisory, telemetry and lifecycle management keep value compounding.

"Convergence is where SAP investments turn into measurable business outcomes."

02

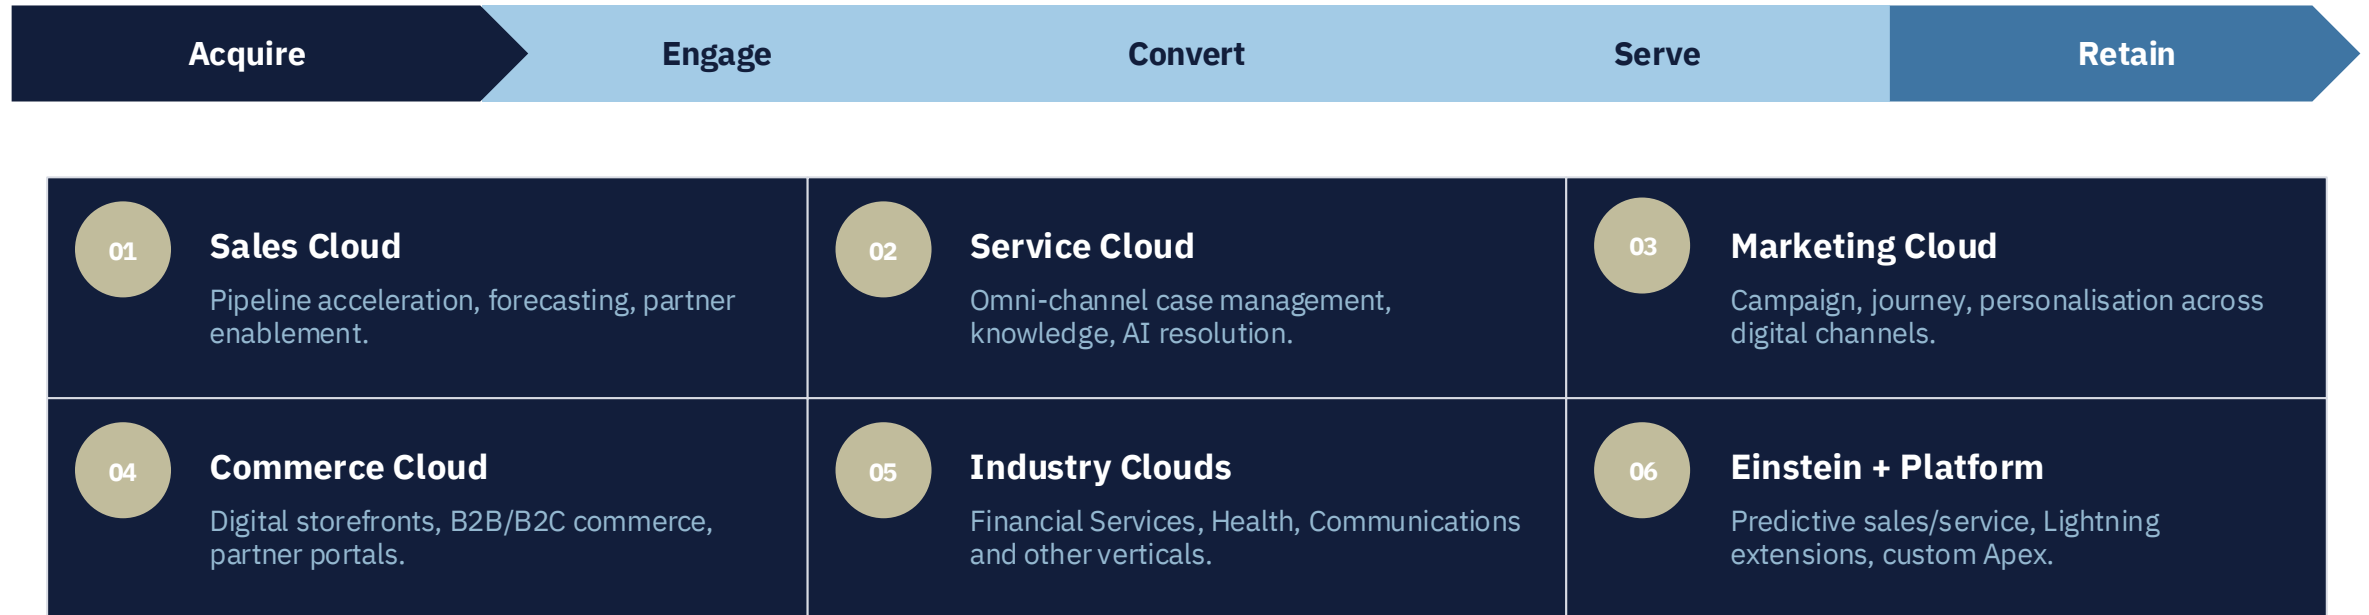

PRACTICE

Salesforce Capabilities

Reimagining the customer experience — Sales, Service, Marketing, Commerce, and Industry Clouds.

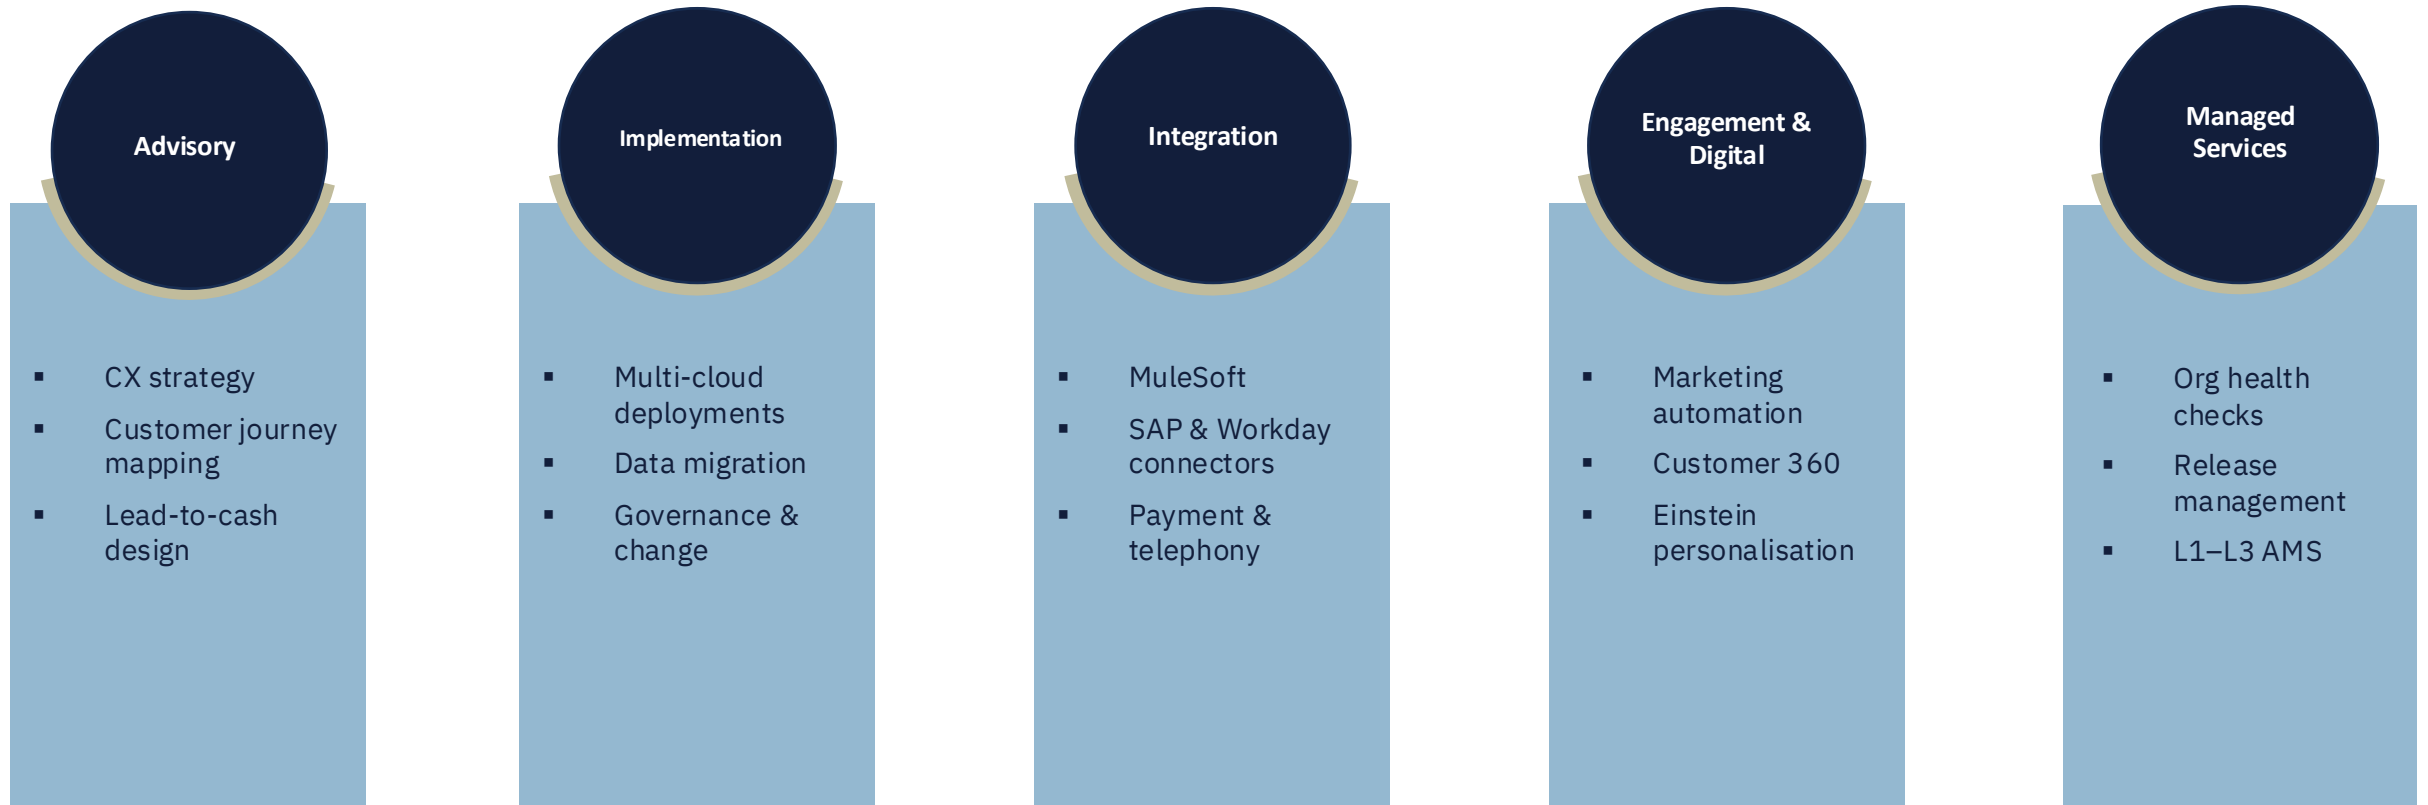

Reimagining customer *experience, end to end.*

We help enterprises transform their customer-facing functions — sales, service, marketing, commerce and field operations — using Salesforce as the digital backbone.

From strategy to steady state.

Five engagement types covering the full Salesforce lifecycle — used independently or chained into a multi-year transformation programme.

03

PRACTICE

Workday Capabilities

Modernising HR and finance functions on a single cloud platform.

Enabling the modern workforce, *on Workday.*

We partner with enterprises on full-lifecycle Workday transformations — from advisory and implementation through to integration and managed services.

HCM Transformation

Core HR · Talent ·
Compensation ·
Benefits · Time &
Absence

Workforce Analytics

People analytics,
dashboards,
predictive insights.

Financial Management

Workday Financials,
multi-entity
accounting, planning.

Workforce Planning

Headcount, scenario
modelling, talent
supply analysis.

Adaptive Planning

Driver-based
planning,
forecasting, scenario
analysis.

PRACTICE STRENGTH

Workday-certified consultants · multi-region experience · integration patterns with SAP, Salesforce, and legacy HR systems.

Five engagement types, *one Workday delivery team.*

From early advisory through tenant lifecycle management, our Workday delivery team operates as a single integrated unit across onshore and offshore.

Workforce Transformation Advisory

- HR digitisation roadmap
- Process re-engineering
- Change management

Implementation

- Phased deployment
- Configuration
- Data migration
- Parallel testing
- Hypercare

Integration

- Workday Studio · EIB
- Core Connectors
- SuccessFactors · Payroll · Identity

HR Analytics

- Prism Analytics
- People Analytics
- Dashboards & reporting

Managed Services

- Tenant management
- Release support
- L1–L3 support
- Continuous optimisation

04

PRACTICE

ADMS Capabilities

Application development, modernization and managed services across stacks.

Build, integrate, run — *across every stack.*

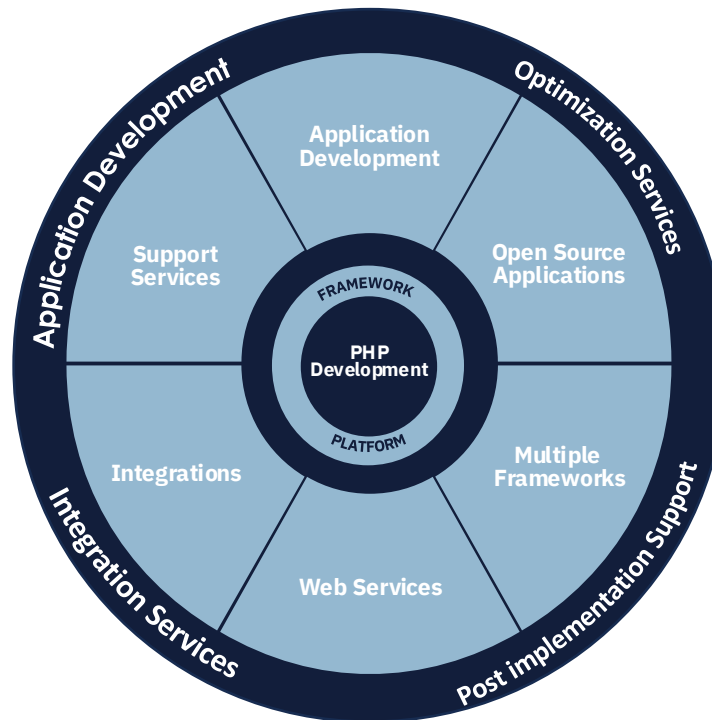

Our Application Development & Managed Services practice covers custom development, integrations, post-implementation support and continuous improvement across legacy and modern application estates.

Application Development Services

- Application Development
- Custom Development
- Open-Source Customization
- Multiple Framework Support including Laravel, CakePHP, Codeigniter, .NET etc.

Integration Services

- Payment Gateway Integration
- Third party product integration
- Salesforce, POS, ecommerce like Shopify & Magento
- Webservices

Optimization Services

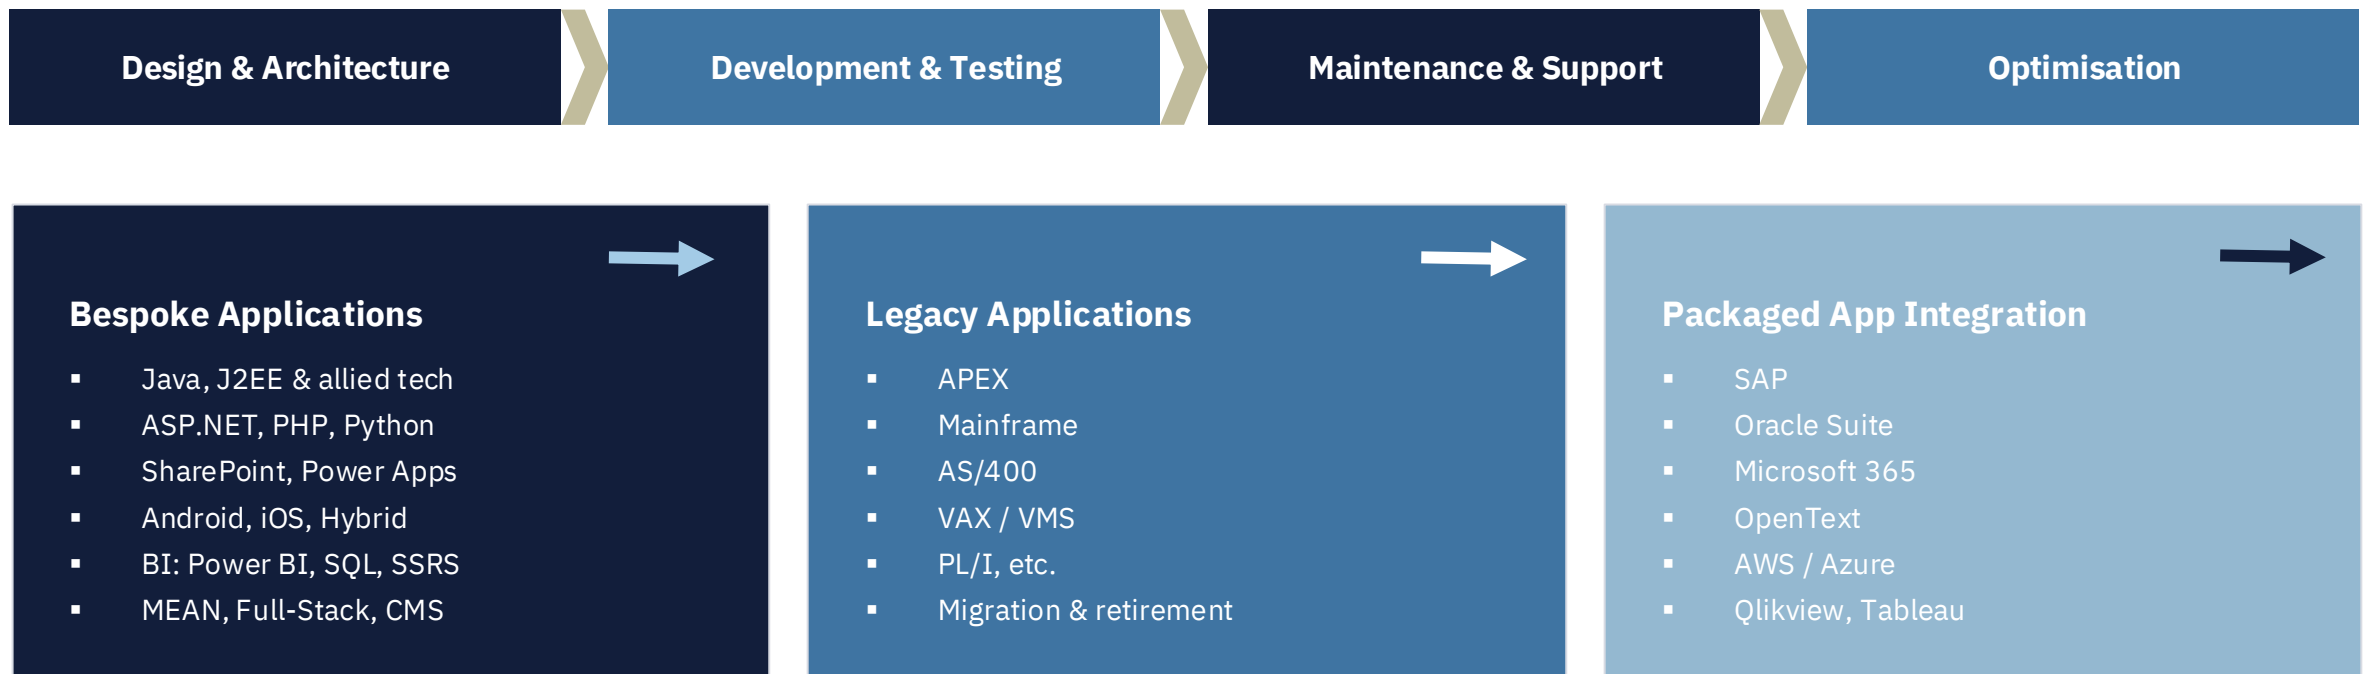

- Advisory Services
- System health Check assessment
- Gap-fit Analysis
- Organizational Change management
- Quality Assurance
- Optimization & continuous improvement

Post implementation Support

- Post-production Support- AMS
- Enhancement
- Upgrades

An application lifecycle — *with every layer covered.*

Four lifecycle stages, anchored in AIM and ITIL, deployed across tailor-made, legacy and packaged application estates.

05

HOW WE DELIVER

Delivery Excellence

Methodology, transition approach, and the factory model behind every engagement.

In2IT FastForward.

Our proprietary delivery method.

A branded delivery method built on SAP Activate, accelerated by pre-built assets, and governed by a single quality gate at every phase. Applied uniformly across SAP, Salesforce, Workday and ADMS programs.

FOUR ACCELERATING LAYERS

01

Pre-Built Assets

RDS accelerators, RICEFW templates, country-localizations, integration patterns and pre-configured S/4HANA solutions.

02

Single Delivery Team

Same team from Discover through Run. No handoffs, no re-learning. Onsite leads + offshore factory + AMS bench.

03

Quality Gates

Stage-gate quality reviews at every Activate phase. Independent assurance team, signed off by client steering.

04

Outcome-linked Pricing

Fixed-bid and outcome-based commercials available alongside T&M. Risk shared, not pushed.

16 weeks to safe steady-state.

Our five-phase AMS transition runs from pre-transition planning to full-service commencement, with quality gates at every phase and overlap with incumbent teams.

	Pre-Transition Planning	Planning	Knowledge Acquisition	Shadow	Reverse Shadow
	Wks -4 to 0	Wks 1–2	Wks 3–7	Wks 8–12	Wks 13–16
Key Activity	- Governance setup - Confirm transition plan - Network connectivity - Service desk bonding - Team Onboarding	- Team onboarding - Detailed KT plan - Access provisioning - Phase completion criteria	- KT sessions - Documentation drafts - Application understanding doc - Process & procedure doc	- Shadow live tickets - Update documentation - Operational readiness review	- Lead on ticket resolution - Final documentation - Service commencement
Deliverables	- High-level transition plan - Phase quality gates	- Detailed transition plan - Phase completion report	- Draft application understanding doc - Draft process & procedure doc - Phase completion report	- Draft application understanding doc - Draft process & procedure doc - Phase completion report	- Final application understanding doc - Final process and procedure doc - Phase completion report

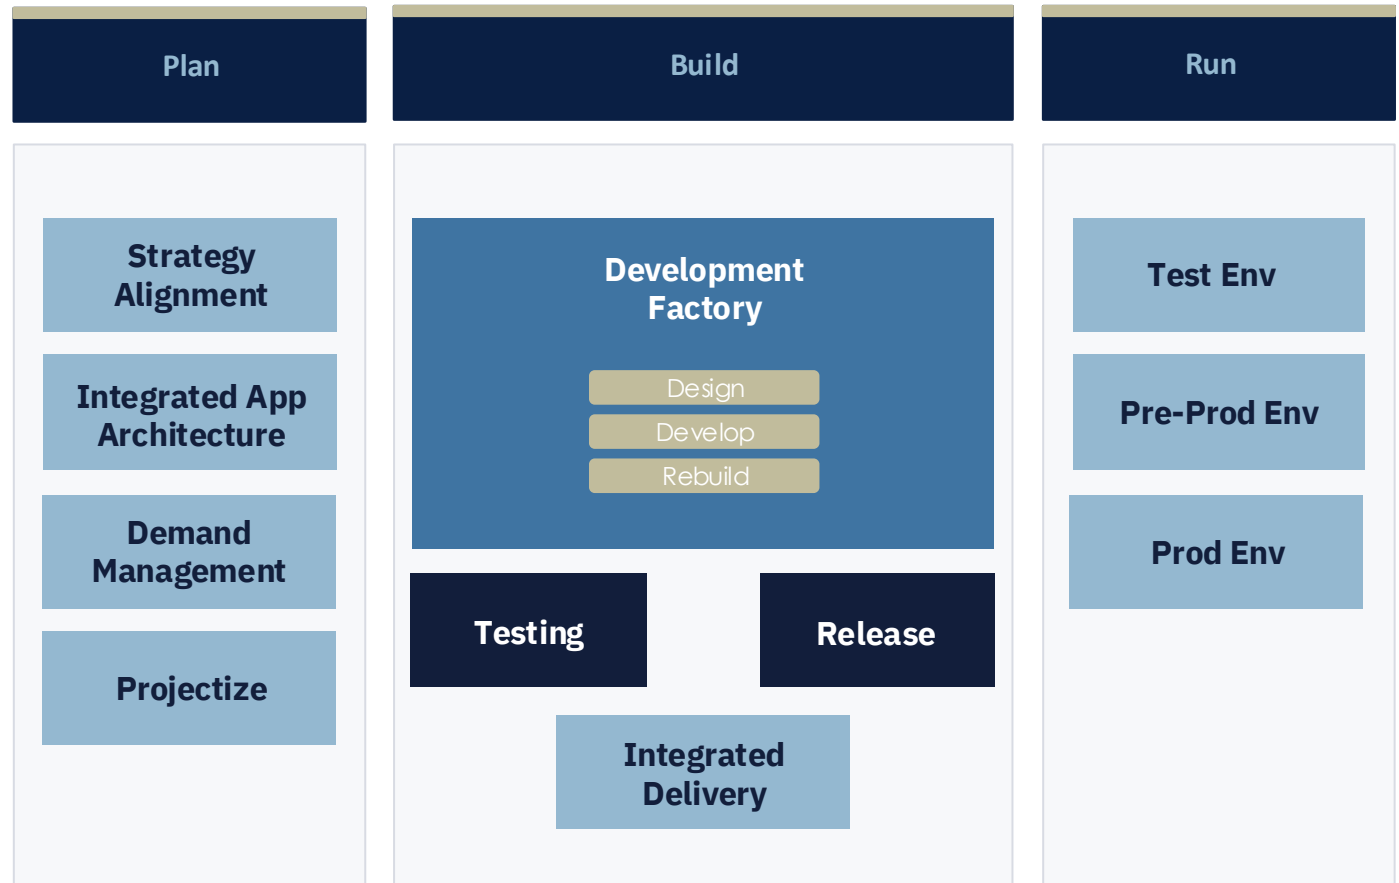

Pre-Planning Start → Transition Start → Service Commencement

Development factory, *industrialised.*

A standardised, repeatable, automated development model — built on factory principles to drive quality, productivity and predictable throughput.

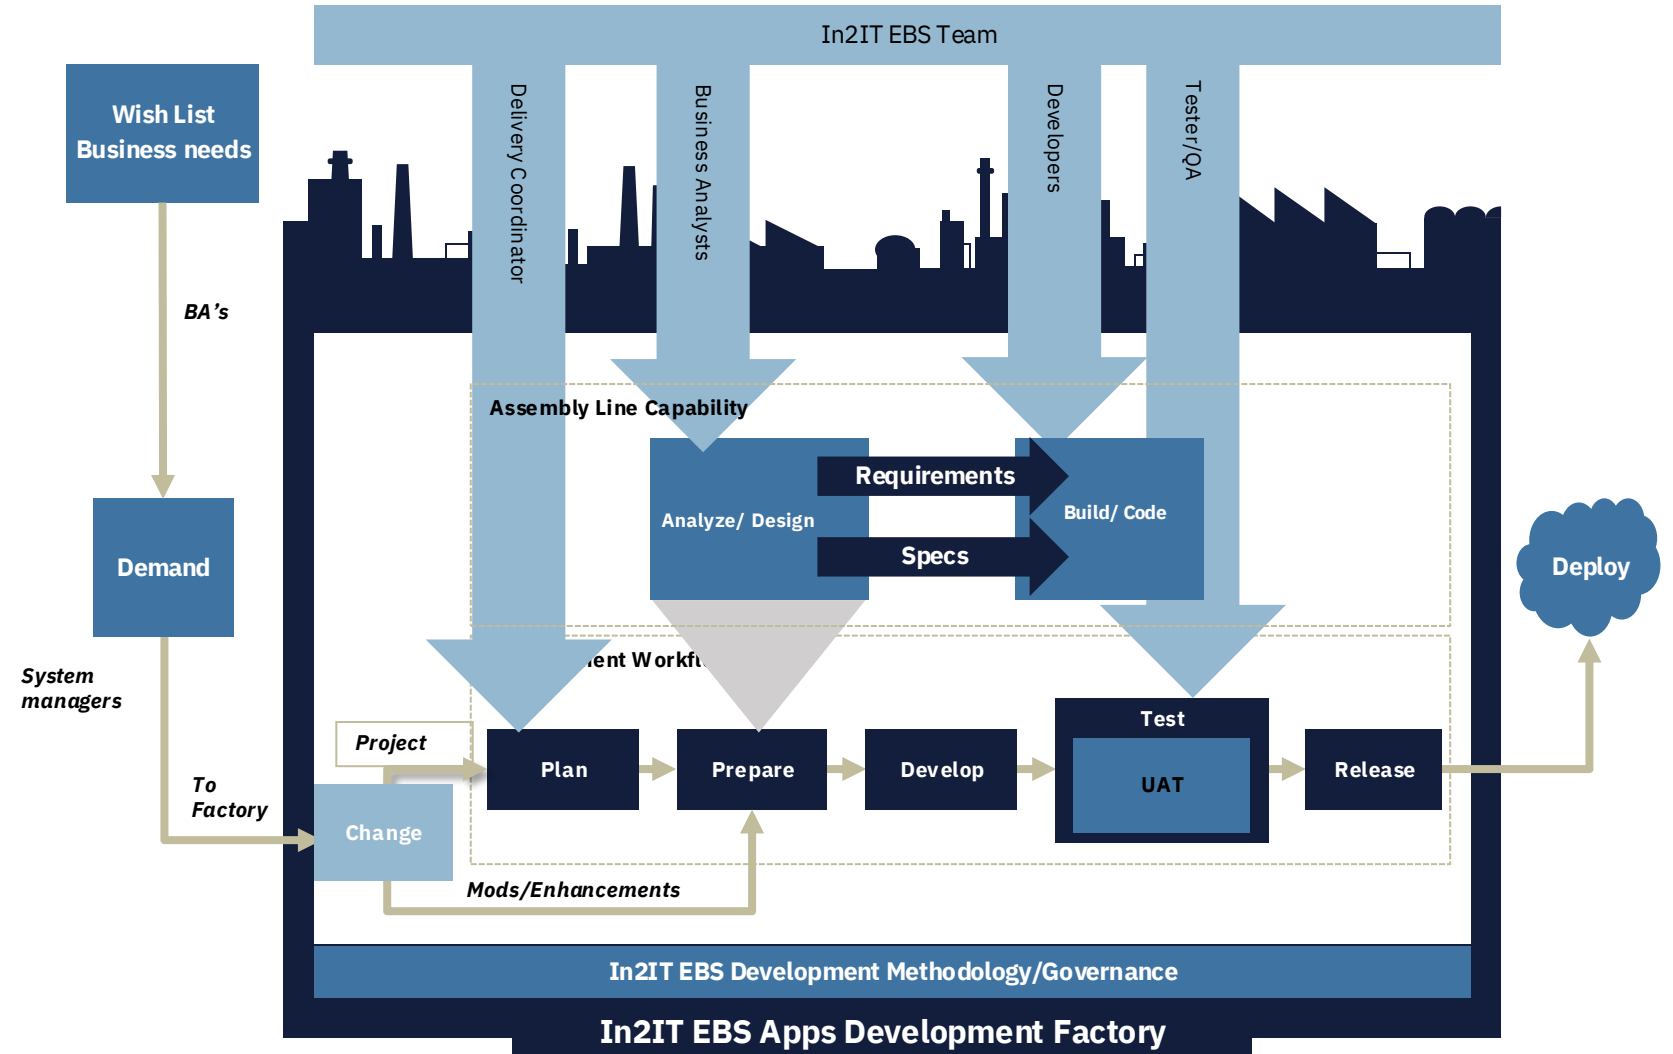

FACTORY PRINCIPLES

- Standard, repeatable, automated services in a leveraged service-centre model
- Factory model with output measurement for quality, productivity and efficiency
- Full ALM support for application development lifecycles
- Integrated testing capability for quality assurance and compliance
- Driven by proven best practices, frameworks, templates and tools

Demand → Factory → Release.

How work flows through the factory: business demand becomes prioritized projects, projects feed an assembly-line development workflow, and outputs ship through structured releases.

150+ global enterprises.

Across regulated, complex complex industries.

Selected clients across six sectors where we've delivered SAP, Salesforce, Workday and application transformation programmes.

Food & Beverages

Health & Pharma

Apparel & Fashion

Metals & Mining

IT & Professional Services

Infra & Housing

More sectors, and more success stories.

Additional sectors served, and three brief spotlight stories. Note: detailed case studies are available on request, under NDA.

Automotives
Chemicals
PSUs
Services & BFSI
Real Estate
Others

WHY IN2IT EBS

Three reasons enterprises choose us — *and stay with us.*

Not seven generic claims. Three differentiated capabilities, each backed by evidence.

01 · PARTNERSHIP DEPTH

Top-tier SAP credentials

SAP Gold Partner, RISE with SAP (BTaaS), PCE Partner and Co-Innovation Partner — a combination held by a narrow group of firms globally.

Gold · RISE · PCE · Co-Innovation

02 · DELIVERY ECONOMICS

Availability at scale and speed

550+ employees across 10 delivery centres. Follow-the-sun coverage across four time zones, with proven offshore-led AMS.

1,000+ combined years of SAP experience

03 · ACCELERATED OUTCOMES

FastForward methodology

Branded delivery method built on SAP Activate, accelerated by pre-built assets — compresses S/4HANA timelines by up to 28%.

RDS · Localization Pack · Industry templates

Next step: let's schedule a 30-minute discovery workshop to map your transformation priorities.

Thank you.

Let's talk about your transformation.
